**Descriptif du cours:** Note that this course is delivered in 4 days in the Classroom and 5 shorter days in Live Online.

This lecture/lab course provides a technical introduction to the basic operations of the Documentum Content Server platform and a general overview of Documentum technology and products. Students will be introduced to Documentum's product architecture, content management functionality, underlying technical structure and basic application configuration.

Registration for this course automatically registers you for the Technical Fundamentals of Documentum Supplemental Materials eLearning Passport. Check your myEducation > mySubscriptions page to see the courses contained in this eLearning Passport.

Technical Fundamentals of Documentum is the prerequisite course for most of our technical courses. Please check the learning paths for your appropriate next course.

**Pré-requis:**

- Understanding of client/server technology
- Familiarity with Web browser/application server technology
- Familiarity with relational database concepts
- Familiarity with Microsoft Office products

- Manipulate the Content Server repository through DQL commands

**Plan:**

- Enterprise Content Management
  - ECM Basics
  - Content Server Repository
  - Working with the Repository

Managing Content

- Creating Content
- Viewing Properties
- Manipulating Content

Working with Content

- Editing Content
- Versions
- Working with Renditions
- Format Preferences
- Annotations
- Relationships
- Subscriptions
- Notifications
- Shortcuts

Objects and Types

- Objects
- Types
- Type Architecture
- Basic DQL Queries

Users and Privileges

- Users
- User Authentication

- User Access
- Creating Users
- Useful DQL Queries
  
- Groups and Roles
- Groups
- Creating Groups
- Roles
- Creating Roles
- Dynamic Groups
- Useful DQL Queries
  
- Object Security
- Object Permissions
- Permission Sets
- Special Conditions
- Folder Security
- Creating a Permission Set
- Assigning Permissions
- Advanced Security
- Useful DQL Queries
  
- Searching
- Searching
- Search Configuration
- Simple Search
- Advanced Search
- Search Syntax
- Search Results
- Saving Searches
- Search Preferences
- Useful DQL Queries
  
- Architecture
- Platform Architecture
- Client-Server Communication
- Useful DQL Queries
  
- Workflows
- Quickflows
- Workflows
- Managing Workflows
  
- Custom Types
- Custom Types
- The Data Dictionary
- Document Templates
- Modifying Custom Types
- Useful DQL Queries
  
- Advanced DQL
- SELECT Options
- Column and Property Predicates
- Sysobject Predicates
- Scalar Functions
- Aggregate Functions
- Date Functions
- Other Functions
- Registered Tables
  
- Object Relationships
- Content Files
- Object-Content Relationships
- Object Relationships
- Version Relationships
- Other Relationships
  
- Beyond Fundamentals
  
- Supplemental Materials
- Virtual Documents
- Virtual Documents Overview
- Working with Virtual Documents
- Snapshots
- Virtual Document Preferences
- XML Management
- Useful DQL Queries
  
- System Administration Overview
- Administration Tasks
- Content Server Installation
